

MB-200T00-A: Microsoft Power Platform + Dynamics 365 Core

Course Outline

Module 1: Power Platform overview

In this module, you will learn the basics of the Power Platform. You will tour the various administrator portals and install applications.

Lessons

- Overview
- Configure Power Platform environments
- Creating applications
- Discovery and planning

Module 2: Data Modeling

In this module you will learn how to model data effectively using the platform's entities, attributes and relationships.

Lessons

- Data model fundamentals
- Relationships
- Other entity options
- Other field options
- Internationalizing

Module 3: Model-driven apps

In this module you will learn about model driven applications and how to configure and use them.

Lessons

- Configure model-driven apps
- Configure model-driven forms
- Configure views
- Configure model-driven charts
- Configure model-driven dashboards
- Configure reports

Module 4: Canvas apps

In this module you will learn how to create and use canvas apps, as well as learn the differences between canvas apps and model-driven.

Lessons

- Application fundamentals
- Working with data and services
- Customizing the user experience
- Integration with model-driven apps

Module 5: Security

In this module you will learn how the platform's security model manages users' experiences and access to both data and functionality.

Lessons

- Security overview
- Business units
- Manage security roles
- Manage teams
- Configure hierarchy security

Module 6: Platform Automation Overview

In this module you will learn the basics of the Power Platform automation capabilities.

Lessons

- Automation overview

Module 7: Business Rules

In this module you will learn how to build and use business rules and how they work alongside other platform automations.

Lessons

- Introduction to business rules
- Additional business rule details

Module 8: Workflows

In this module you will learn how to build and use workflows and how they work alongside other platform automations.

Lessons

- Introduction to workflows
- Building workflows
- Advanced workflows

Module 9: Microsoft Flows

In this module you will learn how to build and use Microsoft Flows and how they work alongside other platform automations.

Lessons

- Introduction to Microsoft Flow
- Other Flow concepts
- Working with CDS
- Building approval flows
- Starting from apps
- Flow deployment considerations

Module 10: Business Process Flows

In this module you will learn how to build and use business process flows and how they work alongside other platform automations.

Lessons

- Introduction to business process flows
- Configure business process flows
- Additional business process flow details

Module 11: Introduction to integrations

In this module you will learn the basics of the Power Platform integration capabilities. You will learn how to configure and use email integrations.

Lessons

- Overview of common scenarios
- Email integration
- Outlook integration

Module 12: Integration with Office

In this module you will learn how to integrate with common Office products like OneNote, Word and Excel.

Lessons

- Templates
- SharePoint
- Microsoft Teams
- Additional integrations

Module 13: Managing Data

In this module you will learn how to import and export data for the Power Platform and create and use data maps.

Lessons

- Managing data overview
- Duplicate detection
- Importing data
- Exporting data
- Bulk delete

Module 14: Manage Instances and Applications

In this module you will learn how to enable and update first-party applications; install third-party apps and configure using admin portals.

Lessons

- Overview
- Manage applications

Module 15: Manage Solutions

In this module you will learn how to create, manage and deploy solutions.

Lessons

- Solution concepts
- Planning and creating solutions
- Working with solution components
- Distributing solutions
- Working with managed solutions

Module 16: Additional Deployment Considerations

In this module you will learn how to configure for mobile and deploy components such as Microsoft Flow.

Lessons

- Configure settings
- Mobile configuration settings
- Mobile configuration
